The manufacturer reserves the right to make changes to design and component specifications.
1 Safety Precautions

- The machine is not to be used if industrial chemicals have been used for cleaning.
- Do not dry unwashed items in the machine.
- Items that have been soiled with substances such as cooking oil, acetone, alcohol, petrol, kerosene, spot removers, turpentine, waxes and wax removers should be washed in hot water with an extra amount of detergent before being dried in the machine.
- Items such as foam rubber (latex foam), shower caps, waterproof textiles, rubber backed articles and clothes or pillows fitted with foam rubber pads should not be dried in the machine.
- Fabric softeners or similar products should be used as specified by the fabric softener instructions.
- The final part of a drying cycle occurs without heat (cool down cycle) to ensure that the items are left at a temperature that ensures that the items will not be damaged.
- Remove all objects from pockets such as lighters and matches.
- WARNING. Never stop the machine before the end of the drying cycle unless all items are quickly removed and spread out so that the heat is dissipated.
- Adequate ventilation has to be provided to avoid the back flow of gases into the room for appliances burning other fuels, including open fires.
- Exhaust air must not be discharged into a flue which is used for exhausting fumes from appliances burning gas or other fuels.
- The machine must not be installed behind a lockable door, a sliding door or a door with a hinge on the opposite side to that of the machine in such a way that a full opening of the machine is restricted.
- If the machine has a lint trap this has to be cleaned frequently.
- The lint must not be accumulated around the machine.
- DO NOT MODIFY THIS APPLIANCE.
- Servicing shall be carried out only by authorized personnel.
- Only authorized spare parts, accessories and consumables shall be used.
• When performing service or replacing parts, the power must be disconnected.
• When the power is disconnected, the operator must see that the machine is disconnected (that the plug is removed and remains removed) from any point to which he has access. If this is not possible, due to the construction or installation of the machine, a disconnection with a locking system in the isolated position shall be provided.
• In accordance with the wiring rules: mount a multi-pole switch prior to the machine to facilitate installation and service operations.
• The openings in the base, shall not be obstructed by a carpet.
• Maximum mass of dry cloth: 19.4 kg.
• A-weighted emission sound pressure level at working stations: 70 dB (A).

Gas heated tumble dryer:
• Before installation, check that the local distribution conditions, nature of gas and pressure and the adjustment of the appliance are compatible.
• The machine is not to be installed in rooms containing cleaning machines with perchloroethylene, TRICHLOROETHYLENE or CHLOROFLUOROCONTAINING HYDROCARBONS as cleaning agents.
• If you can smell gas:
  – Do not switch on any equipment
  – Do not use electrical switches
  – Do not use telephones in the building
  – Evacuate the room, building or area
  – Contact the person responsible for the machine
• Additional requirements for the following countries; AT, BE, BG, HR, CY, CZ, DK, EE, FI, FR, DE, GR, HU, IS, IE, IT, LV, LT, LU, MT, NL, NO, PL, PT, RO, SK, SI, ES, SE, CH, TR, UK:
  – The appliance can be used in public areas.
  – This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe
way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.

• Additional requirements for other countries:
  – This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.

1.1 General safety information
In order to prevent damage to the electronics (and other parts) that may occur as the result of condensation, the machine should be placed in room temperature for 24 hours before being used for the first time.

1.2 Commercial use only
The machine/machines covered by this manual is/are made for commercial and industrial use only.

2 Program description

2.1 General
The machine is equipped with a number of programs adapted to the range of use to which the machine is intended — different markets use different programs. The following program description is a short description of some examples of programs that can be used.

For a complete and detailed information about all the available drying programs, please refer to Electrolux web-site.
It is recommended to follow the care labelling of the garment as far as possible.
For best possible drying result it is advisable to dry garments of the same quality for each drying cycle.
2.2 Program description

There are two types of programs, automatic programs and time programs. Automatic programs have moisture detection and will stop when selected dryness is achieved. Time programs have no moisture detection and will stop when the preset or selected time has ended.

The following table shows some examples of available programs and a short description of those:

<table>
<thead>
<tr>
<th>Automatic programs</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>NORMAL</td>
<td>Cotton and terry. Normal/medium temperature. The program will stop when preset dryness/selected option is achieved (Extra dry, Dry or Iron dry).</td>
</tr>
<tr>
<td>LOW</td>
<td>Synthetic (example of synthetic fabrics: polyester, polyamide, polyacrylic and elastan), viscose, polycotton and delicate fabrics. Low temperature. The program will stop when preset dryness/selected option is achieved (Extra dry, Dry or Iron dry).</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Time programs</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>NORMAL</td>
<td>Cotton and terry. Different drying times can be selected. The program will stop when the time is up.</td>
</tr>
<tr>
<td>LOW</td>
<td>Synthetic (example of synthetic fabrics: polyester, polyamide, polyacrylic and elastan), viscose, polycotton and delicate fabrics. Different drying times can be selected. The program will stop when the time is up.</td>
</tr>
<tr>
<td>NO HEATING</td>
<td>Airing bedspreads, duvets and bedclothes. Different drying times can be selected. The program will stop when the time is up.</td>
</tr>
</tbody>
</table>
The following table shows some examples of different programs that are used for special markets such as hospitals, restaurants, camping sites etc. and a short description of those:

<table>
<thead>
<tr>
<th>Automatic programs</th>
<th>Description</th>
</tr>
</thead>
</table>
| NORMAL EXTRA DRY   | Denim and terry.  
The program will stop when set dryness is achieved. |
| LOW EXTRA DRY      | Viscose and polycotton.  
The program will stop when set dryness is achieved. |
| NORMAL DRY         | Cotton and terry.  
The program will stop when set dryness is achieved. |
| LOW DRY            | Synthetic (example of synthetic fabrics: polyester, polyamide, polyacrylic and elastan), viscose, polycotton and delicate fabrics.  
The program will stop when set dryness is achieved. |
| NORMAL IRON DRY    | Cotton.  
The program will stop when set dryness is achieved. |
| LOW IRON DRY       | Synthetic (example of synthetic fabrics: polyester, polyamide, polyacrylic and elastan), viscose, polycotton and delicate fabrics.  
The program will stop when set dryness is achieved. |

<table>
<thead>
<tr>
<th>Time programs</th>
<th>Description</th>
</tr>
</thead>
</table>
| NORMAL             | Cotton and terry.  
Different drying times can be selected.  
The program will stop when the time is up. |
| LOW                | Synthetic (example of synthetic fabrics: polyester, polyamide, polyacrylic and elastan), viscose, polycotton and delicate fabrics.  
Different drying times can be selected.  
The program will stop when the time is up. |
| NO HEATING         | Airing bedspreads, duvets and bedclothes.  
Different drying times can be selected.  
The program will stop when the time is up. |

The following table shows some examples of available programs used on coin operated machines and a short description of those:

<table>
<thead>
<tr>
<th>Time programs</th>
<th>Description</th>
</tr>
</thead>
</table>
| HIGH               | Cotton and terry.  
The program will stop when the time is up. |
| MEDIUM             | Cotton and terry.  
The program will stop when the time is up. |
| LOW                | Synthetic (example of synthetic fabrics: polyester, polyamide, polyacrylic and elastan), viscose, polycotton and delicate fabrics.  
The program will stop when the time is up. |
| NO HEATING         | Airing bedspreads, duvets and bedclothes.  
The program will stop when the time is up. |
2.3 Option buttons

The machine is equipped with a number of options adapted to the range of use to which the machine is intended — different markets use different options.

The following table shows some examples of available options and a short description of those:

<table>
<thead>
<tr>
<th>Option button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="ECO PROGRAM" /></td>
<td>Dries using less energy.</td>
</tr>
<tr>
<td><img src="image" alt="CARE PROGRAM" /></td>
<td>Drying of sensitive fabrics. Only suitable for use with small loads.</td>
</tr>
<tr>
<td><img src="image" alt="QUICK PROGRAM" /></td>
<td>The program will be ready as quick as possible.</td>
</tr>
<tr>
<td><img src="image" alt="EXTRA DRY" /></td>
<td>Through drying of thick or multilayered fabrics. Drying stops when “EXTRA DRY” is achieved.</td>
</tr>
<tr>
<td><img src="image" alt="DRY" /></td>
<td>Ready to put in cupboard/closet. Through drying of fabrics of even thicknesses. Drying stops when “DRY” is achieved.</td>
</tr>
<tr>
<td><img src="image" alt="IRON DRY" /></td>
<td>Damp. Ready for ironing. For thin textiles which are to be ironed. Drying stops when “IRON DRY” is achieved.</td>
</tr>
</tbody>
</table>
3 Handling

3.1 Load

Note!
Remove all objects from pockets and make sure there are no metal objects such as screws, pins etc. left. Metal objects might cause damage to the drum.

Load the goods into the machine according to recommendations and close the door. Make sure the filter compartment is clean and clean if necessary.

The maximum load is 19.4 kg.

3.2 How to start the machine
This manual cover different types of machine models. Check the panel on your machine and follow the description for your type of machine.
3.2.1 Panel with buttons and control knob

Select program:

Automatic programs
Select program by turning the control knob.
For automatic programs it is possible to select one of the drying triangle options and/or one of the dryness options.

<table>
<thead>
<tr>
<th>Example of programs</th>
<th>Drying triangle options</th>
<th>Dryness options</th>
</tr>
</thead>
<tbody>
<tr>
<td>NORMAL LOW</td>
<td>ECO PROGRAM</td>
<td>EXTRA DRY</td>
</tr>
<tr>
<td>CARE PROGRAM</td>
<td></td>
<td>DRY</td>
</tr>
<tr>
<td>QUICK PROGRAM</td>
<td></td>
<td>IRON DRY</td>
</tr>
</tbody>
</table>

Start the machine by pressing the control knob.

Time programs
Select program by turning the control knob.

<table>
<thead>
<tr>
<th>Example of programs</th>
</tr>
</thead>
<tbody>
<tr>
<td>NORMAL LOW</td>
</tr>
<tr>
<td>LOW</td>
</tr>
<tr>
<td>NO HEATING</td>
</tr>
</tbody>
</table>

Note!
For Time programs no options are available.
Start the machine by pressing the control knob.
After start it is possible to change the time for the selected program. Turn the control knob to set the desired time.
3.2.2 Panel without buttons

Select program:

**Automatic programs**
Select program by turning the control knob.

<table>
<thead>
<tr>
<th>Example of programs</th>
</tr>
</thead>
<tbody>
<tr>
<td>NORMAL</td>
</tr>
<tr>
<td>EXTRA DRY</td>
</tr>
<tr>
<td>LOW</td>
</tr>
<tr>
<td>EXTRA DRY</td>
</tr>
<tr>
<td>NORMAL DRY</td>
</tr>
<tr>
<td>LOW DRY</td>
</tr>
<tr>
<td>NORMAL IRON DRY</td>
</tr>
<tr>
<td>LOW IRON DRY</td>
</tr>
</tbody>
</table>

Start the machine by pressing the control knob.
Time programs
Select program by turning the control knob.

Example of programs

<table>
<thead>
<tr>
<th>Program</th>
</tr>
</thead>
<tbody>
<tr>
<td>NORMAL</td>
</tr>
<tr>
<td>LOW</td>
</tr>
<tr>
<td>NO HEATING</td>
</tr>
</tbody>
</table>

Start the machine by pressing the control knob.
After start it is possible to change the time for the selected program. Turn the control knob to set the desired time.

3.2.3 Coin operated machines
3.2.3.1 Panel without buttons

Select program by turning the control knob.

Example of programs

<table>
<thead>
<tr>
<th>Program</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIGH</td>
</tr>
<tr>
<td>MEDIUM</td>
</tr>
<tr>
<td>LOW</td>
</tr>
<tr>
<td>NO HEATING</td>
</tr>
</tbody>
</table>

Insert correct amount of coins to start the machine and/or press the control knob.
After start it is possible to add time for the selected program. Insert more coins to add time.
3.2.3.2 Panel without control knob

Select program by pressing the temperature button.

<table>
<thead>
<tr>
<th>Example of programs</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>HIGH</td>
<td><img src="image" alt="HIGH" /></td>
</tr>
<tr>
<td>MEDIUM</td>
<td><img src="image" alt="MEDIUM" /></td>
</tr>
<tr>
<td>LOW</td>
<td><img src="image" alt="LOW" /></td>
</tr>
<tr>
<td>NO HEATING</td>
<td><img src="image" alt="NO HEATING" /></td>
</tr>
</tbody>
</table>

Insert correct amount of coins to start the machine and/or press the start button.
After start it is possible to add time for the selected program. Insert more coins to add time.
3.3 Additional functions

There is a menu with additional functions available for selection after start. When pressing the control knob / start button (on machines without control knob) the menu will appear on the display. Select from the menu by turning the control knob / pressing the up and down buttons and press the control knob / start button to activate.

**Note!**
Some of the functions may not be available or active on your machine.

**Pause**
It is possible to pause an ongoing program.
Select **PAUSE** and activate.
For some machines it is also possible to pause directly when pressing the control knob / start button.
When pressing the control knob / start button again the program will continue.

**End a program**
It is possible to end a program after start.
Select **END PROGRAM** and activate.
When pressing the control knob / start button the program will be ended.

**Status**
Select **STATUS MENU** and activate.
The status menu shows the status for inlet air temp, outlet air temp, RMC and heat for the machine.

**Statistics**
Select **STATISTICS** and activate.
The statistics menu shows total run hours and trip run hours for the machine.

**Change drum speed (only on machines with MCU)**
Select **CHANGE DRUM SPEED** and activate.
Change the drum speed with the control knob / pressing the up and down buttons.
3.4 When program has ended

**Note!**
For the best possible drying result it is important to empty the machine as soon as the program has ended. If the machine is not emptied as soon as the program has ended the drum will rotate in short intervals in order to keep the goods from being wrinkled. Clean the filter compartment after each drying cycle for best performance.

4 Error codes

A fault in the program or in the machine is indicated by an error code on the display. Some of these error codes can be solved easily without contacting service personnel.

<table>
<thead>
<tr>
<th>Error code</th>
<th>Text</th>
<th>Cause/Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>12:11</td>
<td>DRYING ERROR WITH RMC PROGRAM</td>
<td>The longest permitted RMC time has been exceeded. (Applies only to machines with RMC). The machine is overfilled or the garment is too wet.</td>
</tr>
<tr>
<td>12:12</td>
<td>DRYING ERROR WITH AUTOSTOP PROGRAM</td>
<td>The longest permitted automatic stop time has been exceeded. (Applies only to machines with automatic stop). The machine is overfilled or the garment is too wet.</td>
</tr>
<tr>
<td>12:18</td>
<td>REDISTRIBUTION OF LOAD NEEDED</td>
<td>Machine indicates that load is blocking the airflow. Redistribute the load. Restart the machine to clear error message.</td>
</tr>
<tr>
<td>20:1</td>
<td>O.H. DRUM MOTOR</td>
<td>The motor is too hot. The machine will restart automatically when the temperature on the motor is OK (if the door has not been opened).</td>
</tr>
</tbody>
</table>

For other error codes or repeated error codes, disconnect the power for 30 seconds. If the error code keeps coming back, contact authorized service personnel.

5 Maintenance

5.1 General

It is the responsibility of the owner of the machine/the laundry manager to make sure that maintenance is periodically performed.

**Note!**
Lack of maintenance may deteriorate the performance of the machine and may cause damage to components.
5.2 Time for maintenance

When the display is showing the message **TIME FOR MAINTENANCE** — contact the owner of the machine/the laundry manager to perform maintenance (if available, a telephone number and/or a tag will also be displayed). The machine can be used meanwhile. However, the message will keep coming back until the service is performed. The message will disappear after about 30 seconds or if the control knob or any button is pressed.

5.3 Every day

Check that the machine does not operate with the door or the filter door open, if so, the machine must be placed out of order until repairs are made.

**Note!**

Contact qualified service personnel to disconnect power from the affected machine.

Clean the door, door glass, door gasket and other external parts.

Check the filter compartment. Clean if necessary.

Remove the filter door by opening it and pulling it upwards. It is not necessary to remove the lint filter for cleaning.

The air system of the machine ensures that lint and dust settle automatically at the bottom of the filter compartment.

Check that the lint filter is unbroken. Replace if necessary.
Remove any lint and dust around the machine.

5.4 Fresh air intake and fan motor
At regular basis, check that the fresh air intake on the back of the machine is not clogged by lint and dust or otherwise blocked.
Clean if necessary.

5.5 Machines with residual moisture control (RMC)
At regular basis, wipe off/clean drum and lifters with citric acid (Acidum citricum). If soap/softener residue remains, it is recommended also to use a coarse sponge.
Lack of cleaning can reduce the automatic residual moisture control which will make the load more moisture than requested when the program has ended.

5.6 Maintenance to be carried out by qualified service personnel
Contact qualified service personnel to perform the following maintenance:
After 1600 hours of operation or once a year, whichever comes first:
• Clean the fan, the exhaust duct and the fresh-air intake to the room
• On machines with RMC: Clean the glide surface on the RMC graphite collector
• Clean the area around the drum
• Clean the fan wheel
• Clean the motors
• Check the belt tension

6 Disposal information
6.1 Disposal of appliance at end of life
Before disposing of the machine, make sure to carefully check its physical condition, and in particular any parts of the structure that can give or break during scrapping.
The machine’s parts must be disposed of in a differentiated way, according to their different characteristics (e.g. metals, oils, greases, plastic, rubber, etc.).
Different regulations are in force in the various countries, therefore comply with the provisions of the laws and competent bodies in the country where scrapping takes place.
In general, the appliance must be taken to a specialised collection/scrapping centre.
Dismantle the appliance, grouping the components according to their chemical characteristics, remembering that the compressor contains lubricant oil and refrigerant fluid which can be recycled, and that the refrigerator and heat pump components are special waste assimilable with urban waste.

The symbol on the product indicates that this product should not be treated as domestic waste, but must be correctly disposed of in order to prevent any negative consequences for the environment and human health. For further information on the recycling of this product, contact the local dealer or agent, the Customer Care service or the local body responsible for waste disposal.

Note!
When scrapping the machine, any marking, this manual and other documents concerning the appliance must be destroyed.
6.2 Disposal of packing

The packing must be disposed of in compliance with the current regulations in the country where the appliance is used. All the packing materials are environmentally friendly. They can be safely kept, recycled or burned in an appropriate waste incineration plant. Recyclable plastic parts are marked as following examples.

<table>
<thead>
<tr>
<th></th>
<th>Polyethylene:</th>
</tr>
</thead>
<tbody>
<tr>
<td>PE</td>
<td>• Outer wrapping</td>
</tr>
<tr>
<td></td>
<td>• Instructions bag</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th></th>
<th>Polypropylene:</th>
</tr>
</thead>
<tbody>
<tr>
<td>PP</td>
<td>• Straps</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th></th>
<th>Polystyrene foam:</th>
</tr>
</thead>
<tbody>
<tr>
<td>PS</td>
<td>• Corner protectors</td>
</tr>
</tbody>
</table>
