Warewashing
Hood Type Dishwasher, Automatic with ESD, Automatic Deliming Device & Advanced Filtering System

Main Features

- Built-in high efficiency Energy Saving Device (ESD) transfers the heat captured inside the machine to the incoming cold water before entering the boiler, thus saving energy; no ventilation hood is needed for the machine (depending on local regulation and conditional on compliance with VDI 2052).
- Automatic Deliming Device ensures total scale removal from the boiler, the hydraulic circuits and the washing chamber allowing ultimate performances and lower energy consumption thanks to the high-efficiency heating element.
- Advanced Filtering System provides cleaner wash water and higher active detergent thus ensuring better washing performances and lower running costs.
- Requires only 2 liters of water per washing cycle thus ensuring low energy, water, detergent and rinse aid consumption.
- Built-in atmospheric boiler sized to raise incoming cold water to a minimum of 84 °C for sanitizing rinse. No external boiler is required. Constant temperature of 84 °C throughout the rinsing cycle regardless of the network’s water pressure.
- Guaranteed Rinse System (ACTIVE) ensures the correct water temperature and pressure during the rinse phase to guarantee a perfect rinsing performance, independent from the water pressure in the network (min. 0.5 bar).
- Unique temperature interlock guarantees required temperatures in both the wash and final rinse.
- Incorporated Soft Start feature to offer additional protection to more delicate items.
- Automatic start on hood closure and automatic hood lifting when cycle ends.
- Slanted wash arms and sloped ceiling to avoid detergent- filled wash water dropping on clean dishes after the rinsing phase, thus guaranteeing ideal washing results.
- Cycle may be interrupted at any time by lifting the hood.
- Automatic self-cleaning cycle and self-draining vertical wash pump and boiler to avoid bacteria proliferation.
- LED strip on the top keeps operator informed on machine status.
- Built-in rinse aid dispenser with automatic initial and continuous cycle loading for perfect result while minimizing service and maintenance needs.
- Boiler power setting from control panel to facilitate technician’s operation when reducing total installed power, thus avoiding the need of machine opening.
- Three phase electrical connection, convertible to single phase on-site.
- IP25 protection against water jets, solid objects and small animals (larger than 6 mm).
- ZERO LIME Device ensures total scale removal from the boiler, the hydraulic circuits and the washing chamber allowing ultimate performances and lower energy consumption thanks to the high-efficiency heating element.
- CLEAR BLUE advanced filtering system provides cleaner wash water and higher active detergent thus ensuring better washing performances and lower running costs.
- Green light of Guaranteed Rinse System (ACTIVE) confirms that items have been rinsed properly.

Short Form Specification

Item No.

304 Stainless steel construction to include automatic double skin insulated hood, external, front and side panels, wash tank, tank filter plus wash and rinse arms. Uses 2 liters of clean water per final rinse cycle, 84°C rinse temperature and pressure guaranteed by built in AISI 304 atmospheric boiler and built in rinse booster pump. Washing performance is guaranteed by a powerful 0.8 kW wash pump and upper and lower stainless steel revolving washing spray arms. Energy Saving Device recovers the heat inside the machine to heat-up the incoming water to the boiler. Automatic Deliming Device automatically de-scales the whole hydraulic circuit and washing chamber. Unit to feature Guaranteed Rinse System (ACTIVE) led light. Green light will indicate that all items washed have been properly rinsed. Advanced Filtering System removes majority of soil from the wash water. The unit shall include drain pump and rinse aid dispenser pump and is equipped with flexible fill hoses. Convertible from straight to corner operation and delivered on height-adjustable feet.

• NSF/ANSI 3 and DIN 10512 compliant.
• Maximum capacity per hour of 80 racks or 1,440 dishes (High productivity mode) easy to switch to 63 racks or 1,134 dishes (NSF/ANSI 3 mode) by pressing a button.
• 45/84/150 seconds cycles (High productivity mode); 57/84/150 seconds cycles (NSF/ANSI 3 mode).

Construction
• Heavy duty Stainless steel construction. Internal cavity as well as exterior panels are in 304 series Stainless steel.
• Pressed tank in front position to facilitate cleaning.
• Automatic double skin insulated hood.
• Specially designed Stainless steel wash/rinse arms and nozzles provide superior cleaning action.
• Revolving interchangeable Stainless steel wash/rinse arms above and below the rack, screw out for simple clean up.
• Pre-arranged for on-site HACCP implementation and Energy Management device.
• Element protection from dry fire and low water.
• Unit to include drain pump and rinse aid dispenser pump.

Included Accessories
• 2 of Yellow cutlery container PNC 864242
• 1 of Basket for 18 dinner plates or 27 side plates (max. diam. 240 mm) PNC 867002
• 1 of Basket for cups and coffee cups (24-48 pcs) - blue PNC 867007

Optional Accessories
• Kit 8 plastic boxes for cutlery - yellow PNC 780068
