

# Coffee Reimagined

## PrecisionBrew Coffee Solutions

### Innovation meets precision

Brew exceptional coffee  
that meets the Golden Cup  
Standard.

Simply.  
Easily.  
Efficiently.

Introducing PrecisionBrew

# Exceptional coffee. Simple brewing.

Meet the PrecisionBrew line of high-volume shuttle coffee brewers. Providing simple operation, reduced labor, and exceptional coffee, all in a compact space. PrecisionBrew is **the new standard** for coffee.

Simple

Versatile

Efficient

## Streamline brewing

The intuitive, icon-driven user interface provides simple touch-screen ease of use, with multiple brew options to suit any coffee profile.

## Keeps you informed

Readiness and Freshness Indicator Lights in the Encapsulair shuttle change color to signal when the brew is complete, and when it is time to make more coffee.

## The choice is yours

With brew volume options, you only make the coffee you need for that time of day. Quickly and easily alter the brew size to fit demand, reducing waste and saving money.

## Exceptional flavor that lasts

The Java-tate feature gently stirs the coffee to ensure a uniform flavor profile from the first cup to the very last.

## Consistent performance

Encapsulair shuttles circulate hot air between internal chambers to surround your brewed coffee, maintaining its temperature, and preserving its taste.

- Space saving design
- 7" color touch screen
- Safety features on shuttle and brew basket prevent brewing unless secured

- Brew into 5.7 liter shuttles
- Hot water facility
- Self-diagnostic alerts through the touch screen
- Fully programmable to suit any coffee profile
